

## Vending Solution

### Vending Variety

Vending isn't just soda machines anymore. Today vending machines sell a wide variety of food, merchandise, and services. Odyssey PCS vending supports hundreds of vending machines in every conceivable combination. With Odyssey PCS, all your customers need is their ID badge.

### Vending Possibilities

- Coffee machines
- Soda machines
- Snack machines
- Supply machines

### Reporting

System reports provide records of all transactions directly to the institution and the vendor, and can provide powerful marketing data. Reports may be printed from a central location or workstation to collect totals. Reports indicate cardholders' usage, individual spending history, and sales history by location and group.

## Cashless Solution for Healthcare Facilities

### Vending Overview

It's no secret that vending generates revenue by stimulating impulse sales. Add a vending interface reader from CBORD® and the potential for impulse sales increases significantly because buyers no longer need to have change or small bills handy to make their purchases. With the explosion of vending product choices, auditing control over vending services has never been more important. CBORD gives you choices about how to put card-based vending to work for you.

### How It Works

When a card is read at a vending machine, the reader requests account information from Odyssey PCS™. The cardholder's full account balance or available credit limit is displayed on the reader, and the machine is enabled (if the account has sufficient funds). After completing the sale, the purchase amount is displayed on the reader. Vending machines with readers can accept ID cards, gift cards, or cash for payment.

## Benefits

- **Increase revenue**
- **Decrease cash handling**
- **Access reports detailing cash and card transactions**

# Vending Options

## Vending Card Reader

The Vending Interface Reader fits inside a standard full-sized bill validator opening. It can be powered by tapping into the vending machines' existing power, so no external power source is required. There are two cables included: one to connect to the Multi-Drop Bus (MDB) and another to connect to the network.

## Product Specifications

### Card Reader

**Magnetic stripe:** 300 to 4000 oersted magnetic stripe reader with a floating read head

**Card type:** ISO 7810 to 7813

**Card insert:** Horizontal-insert-type-style card

**Magnetic head life:** 300,000 passes

**Optional:** Card swipe, iClass, or Prox available

### Physical Dimensions

**Size:** 4.25" H x 3.875" W x 5.25" D; front bezel width 3.375"

**Shipping weight:** 5 lb.

### Technical Specifications

**Network connectivity:** 10 base-T TCP/IP network protocol

**Operator display:** 2 line x 16 segment LCD with backlight

**Power required:** 24–34 VDC from MDB interface

### Environmental Characteristics

**Operating temperature:** 0–45°C

**Ambient humidity:** 30–85% RH without condensation and frost formation

**Mounting location:** Indoors, away from wind, rain, sunlight, and dust
